

Making your Welcome Page

➤ Entering Text

iWeb uses text boxes for text areas. You may enter text by clicking into any of these text areas, then deleting what is there and replacing it with your own.

To add more text boxes (if you want more or have deleted what you started with), choose Text Box under the Insert menu,

➤ Adding Pictures

Once you have pictures that you would like to use, you can insert them by dragging them on top of a picture already in your template. You can drag them from iPhoto, from a webpage, or from another image location.

Your template includes picture-frames that will resize your picture when inserted. Your number of picture frames depends on the template you choose.

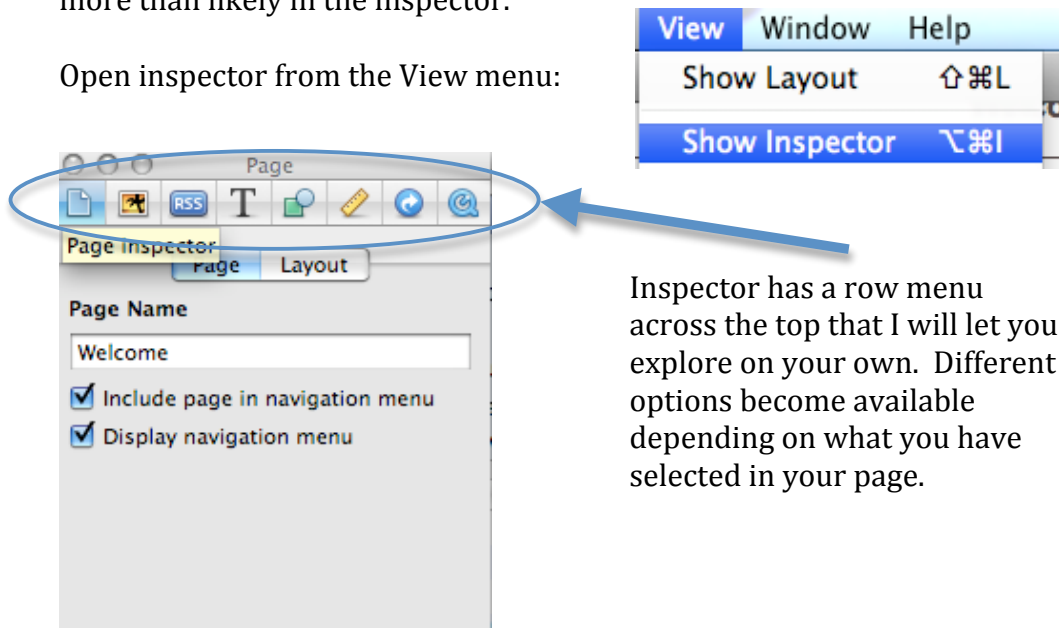

You can drag in pictures without putting them in a frame, but you have to resize manually.

➤ Using Inspector

The Inspector in an iWork or iLife program is a group of useful tools bundled together. If you can't find a tool or option in the top menus, it is more than likely in the inspector.

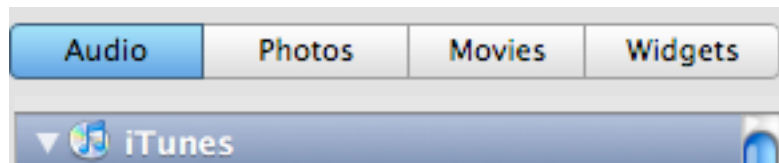

Open inspector from the View menu:

Inspector has a row menu across the top that I will let you explore on your own. Different options become available depending on what you have selected in your page.

➤ Connecting with iLife

iWeb now has convenient access to your iLife programs, to the right of your page.

Under Audio, you can get to your iTunes files; under Photos to iPhoto; and under Movies to iMovie. Anything you have stored in these programs is readily available to insert into your project.

➤ Content for the Welcome page

- Title: "Your name's Elsa High iWeb Website"
- Your school name/ location/ grade/ and form room teacher
- Your Apple Club day and teacher name
- A picture that relates to Apple/ to Elsa/ or to Technology
- A list (of text, not links) to be as a table-of-contents for your site
 - You will have a page for Learning at Elsa pictures
 - You will have a page of samples of your work at Elsa
 - You will have a reflections blog
 - You will have a new technologies blog

- Note that we may add other pages in the future; or you may add pages in other classes. If that happens, come back and update this part of your welcome page.
- Remember: It is not safe to reveal too much personal information on the Web. Once your sites are posted, I will have them in a password protected area, however do not reveal anything you don't feel comfortable about.
